Dear Sir's and Madam's,

the name RUMKE is a term to solve technical problems of production for about 50 years in the ceramic industries.

But our company

RUMKE Keramikmaschinen, Engineering und Handel GmbH

is not only active in the scope of ceramics, its universal the right partner for preparation machines of tone and earth and the transportation of ceramic products.

Centre of gravity of our field of business is the ceramic and the tile - industries.

Besides that we are working in construction- and construction material industries (construction of a ground storage) and in the recycling industries.

Main task of our business is trading with used machinery for the reworking of tone ,just as production, transport and to pack up productions of brick (backing brick, clinker, roofing tile).

This main task of our company encloses following activities:

- Purchase and sale and also removal of plants and machinery
- Overhauling and reparation of machinery suburb or in our firm in Brilon
- Planning of plants from used or new machinery and the combination of both
- Optima ion, modernization and increased output of being plants
- Consultation when problems of production occur
- Agency of single machinery or a whole plant

Farther we have a big depot of used machinery and spares and plants of the tile - industries at one's disposal and also of the rock and earth industries, so we can react fast of the needs of our client.

Also we can answer the needs about cutting wire from our extensive collection of different of strength and qualities.
